

FALL PROTECTION FOR ANY ENVIRONMENT

Mezzanine Safeti-Gates, Inc. is committed to providing durable, ergonomic safety gate solutions. Our strength is designing and manufacturing dual-gate systems for any elevated platform on which workers need fall protection.

Every one of our safety gate systems meets or exceeds **OSHA** regulations, **ANSI** standards, **IBC** codes and **CCOHS** regulations.

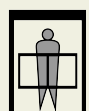

OPTIONS FOR ALL SAFETY GATE DESIGNS

- Single or double wide standard sizes
- Custom sizes
- Powder-coated or stainless steel construction
- Kick plates
- Product containment netting
- Power operation with remote control or push button operation
- Pallet position indicator light system
- Photo eyes, RFID sensors

PALLET DROP SAFETY GATES

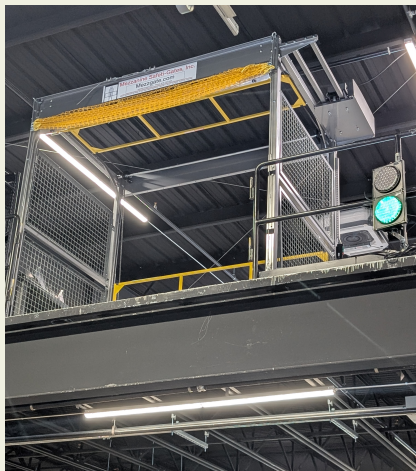

We invented the first dual-gate safety system, the Roly® mezzanine safety gates, over 40 years ago to help one of our customers protect employees from falling from an elevated work platform. Today, we continue to focus on providing fall protection solutions for elevated pallet drop areas and work platforms in material handling, warehousing and manufacturing facilities.

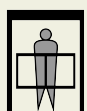

MODELS FOR EVERY APPLICATION

We've installed thousands of safety gates in facilities throughout the world in almost every industry. We offer standard single and double-wide models, as well as custom engineered solutions. Our safety gate designs include:

- Roly®
- Rack Supported
- Tri-Side
- Open Top
- Pallet Flow
- Total Control Access (TCA)
- Pivot and High Pallet Pivot
