MEZZANINE SAFETI-GATES, INC. ANNOUNCES SECOND PRODUCT TRADEMARK, ROBOTGATE®

Company to Exhibit at MODEX in Booth B14615

ESSEX, MA — April 9, 2026 — Mezzanine Safeti-Gates, Inc., the inventor and manufacturer of mezzanine safety gates that provide fall protection for elevated pallet drop areas, production platforms, pick modules, and pallet flow lanes in distribution centers, warehouses, and manufacturing and material handling facilities, announced that it has been awarded a registered trademark for RobotGate® by the United States Patent and Trademark Office.

Executives from Mezzanine Safeti-Gates will be in Atlanta at the MODEX 2026 trade show from April 13–16 in Booth #B14615, where they will discuss RobotGate, as well as the company’s full line of mezzanine safety gates. The RobotGate trademark is registered under No. 8,198,482. It is the company’s second trademark, with Roly® being the first mark awarded.

“Trademarking RobotGate® reinforces our commitment to innovation and our customers,” said Aaron Conway, president, Mezzanine Safeti-Gates, Inc. “It ensures that when companies specify our solutions, they know they’re getting a trusted, purpose-built system designed to protect both their people and their automation investments.”

Used in thousands of locations worldwide, safety gate systems offered by Mezzanine Safeti-Gates can be equipped with additional forklift truck ‘operator-assist’ technologies, including power operation, remote operation, and radio frequency sensors, as well as product containment netting, steel mesh panels, and pallet position indicators. To learn more about the company’s full line of industrial safety gates, visit <https://www.mezzgate.com>.

About Mezzanine Safeti-Gates, Inc.

Headquartered in Essex, Mass., Mezzanine Safeti-Gates has been in business for 44 years and designed the Roly® mezzanine safety gate, the first dual-gate safety system for fall protection, which has been installed in thousands of facilities worldwide. The company offers a full line of mezzanine safety gate models and custom-engineered solutions for elevated work zones, including pallet drop areas, production platforms, pick modules, pallet flow lanes, loading docks, and dock lifts. All gates in the company’s product line can be customized to meet specific facility requirements and comply with OSHA, ANSI, IBC, and CCOHS fall protection standards. A member of MHI, ProGMA, and MHEDA, the company can be reached by phone at 978.768.3000, by email at sales@MezzGate.com, or online at <https://www.MezzGate.com>.
